The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-10, 12, 17, 23, and 26-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chu et al. in view of Yasushi et al. (JP 2001-212253, cited by applicant in the Information Disclosure Statements filed on February 3, 2005 and April 8, 2005) for the reasons explained in the previous Office action. The only change made to these claims in the amendment filed on January 19, 2006 was the addition of the limitation that the apparatus also contains a collimator for shaping the charged particle beam. Since the apparatus disclosed by Chu also comprises such a collimator, this new limitation does nothing to patentably distinguish the claimed invention over the prior art.

Claims 10, 11, 15, 16, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chu et al. and Yasushi et al as applied to claims 1-10, 12, 17, 23, and 26-29

Art Unit: 2881

above, and further in view of either Moyers et al. or Hernandez et al. for the reasons explained in the previous Office action.

Claims 13, 14, 18-20, 24, 25, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chu et al. and Yasushi et al. as applied to claims 1-10, 12, 17, 23, and 26-29 above, and further in view of Huntziger for the reasons explained in the previous Office action.

Applicant's arguments filed January 19, 2006 have been fully considered but they are not persuasive. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
